.

Battle Command Knowledge Network System (BCKS)

Knowledge to the Warfighter

1. Warrior Knowledge Base

2. Training Support Toolkit= ATIA

Communities of Practice

Knowledge Transfer

Adaptive Leaders

Virtual Leader Teams

3. Knowledge Reach Toolkit

4. Embedded Training

5. Leader Development Toolkit

Innovation

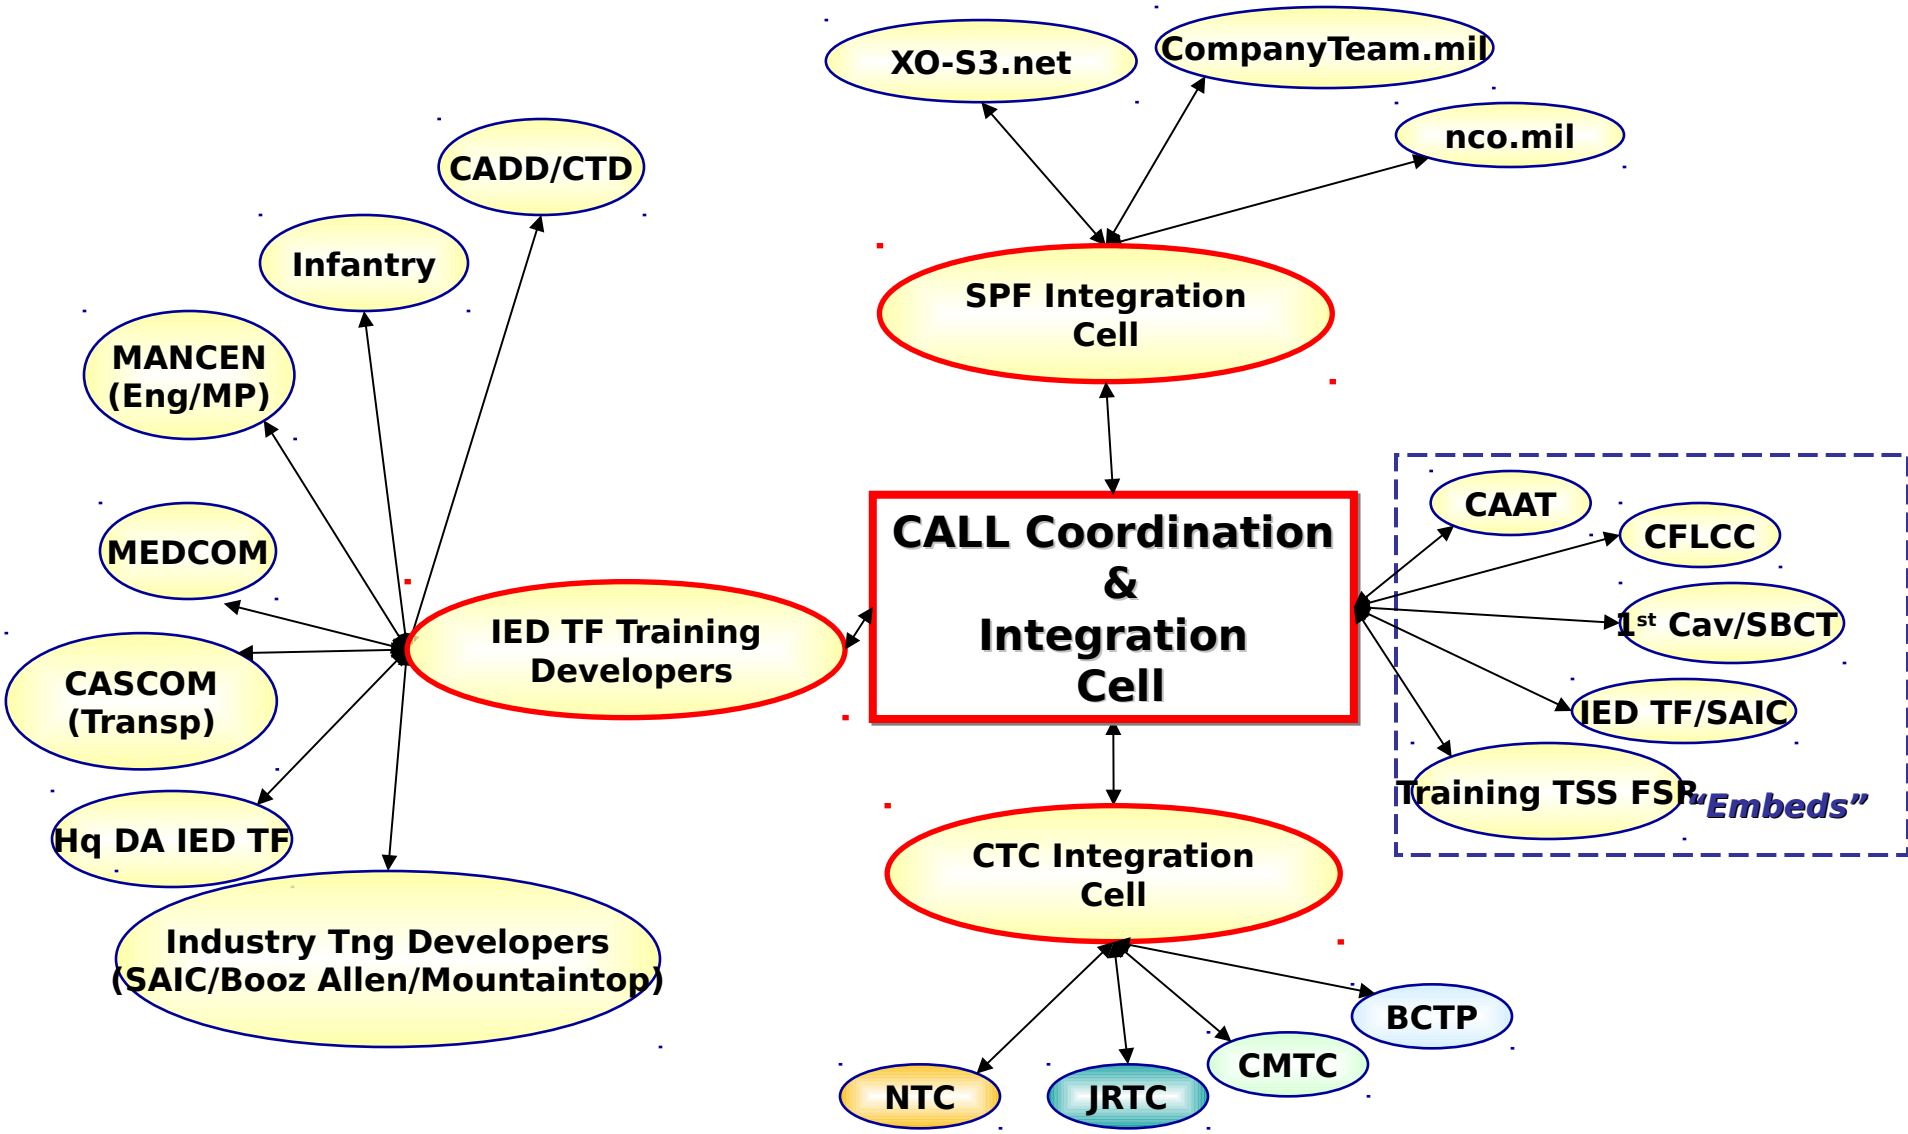
Knowledge to the Institution

BCKS is the overarching system and mechanism that provide the soldier/leader with transformational learning and teaching capabilities necessary to achieve decision dominance

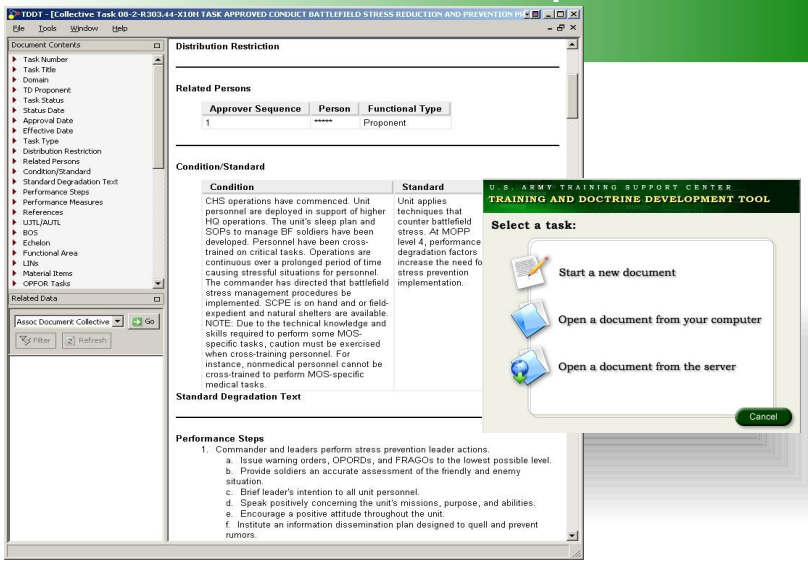
BCKS (New) = WKN (Old) + Army Training Information (ATIA) + Embedded Training within a Battle Command Framework

IED Training Developer Virtual ActionTeam

Rapid incorporation of Lessons Learned: Streamlining the flow of lessons learned to assure broader and faster dissemination.



Training and Doctrine Development Tool



Provides Training Developers the tools to –

- Manage individual and collective training
- Supports the analysis and development of task based training

Products -

- Soldier Training Publications
- Mission Training Plans
- Combined Arms Training Strategies
- Programs of Instruction, and courses
